**GREATER MANCHESTER TRANSPORTATION UNIT**

# **REPORTED ROAD CASUALTY STATISTICS GREATER MANCHESTER 2009**

## **DISTRICT TABULATIONS AND COMPARISONS**

This report is one of two reports produced to accompany the Reported Road Casualty Statistics Greater Manchester 2009 report (GMTU Report 1599). All commentary is included in the main report. This accompanying report is only available in electronic format.

This report presents tabulations and comparisons of reported road traffic accidents and casualties by district.

Section One provides information for each of the ten districts plus Greater Manchester as a whole, whilst Section Two provides comparisons between districts.

No commentary is provided in this accompanying report, but it is worth noting that the data shows that the trends in reported Killed and Seriously Injured (KSI) casualties vary considerably between the ten districts. In 2009 KSI casualties varied from 54% below the base years (the average of 1994 to 1998) in Tameside MBC compared to just 9% below in Bury MBC. In Greater Manchester as a whole, KSI casualties were 38% below the base. A further 3% reduction is required to meet the national target for 2010.

The trends in reported child KSIs are very encouraging and range from a 23% fall in Stockport MBC to almost 75% in Rochdale MBC. In Greater Manchester as a whole, child KSI casualties in 2009 were nearly 58% below the base. The number of child KSI casualties has already met the 2010 child KSI target of 50% for the third consecutive year.
