

# REPORTED ROAD CASUALTY STATISTICS GREATER MANCHESTER 2010

## DISTRICT TABULATIONS AND COMPARISONS

This report is one of two reports produced to accompany the Reported Road Casualty Statistics Greater Manchester 2010 report (GMFAS Report 1651). All commentary is included in the main report. This accompanying report is only available in electronic format.

This report presents tabulations and comparisons of reported road traffic accidents and casualties by district.

Section One provides information for each of the ten districts plus Greater Manchester as a whole, whilst Section Two provides comparisons between districts.

No commentary is provided in this accompanying report, but it is worth noting that the data shows that the trends in reported Killed and Seriously Injured (KSI) casualties vary between the ten districts. In 2010 KSI casualties varied from 58% below the base years (the average of 1994 to 1998) in Wigan MBC compared to 20% below in Bury MBC. In Greater Manchester as a whole, KSI casualties were 42% below the base. The number of KSI casualties has met the set 2010 national target of 40%.

The trends in reported child KSIs are very encouraging and range from a 27% fall in Oldham MBC to almost 81% in Stockport MBC. In Greater Manchester as a whole, child KSI casualties in 2010 were almost 58% below the base. The number of child KSI casualties has already met the 2010 national target of a 50% reduction for the fourth consecutive year.

Final Analyses of trends relative to the targets set for the year 2010 are presented in the main report.
