# **ROAD CASUALTY STATISTICS GREATER MANCHESTER 2006**

## **DISTRICT TABULATIONS AND COMPARISONS**

This report is one of two reports produced to accompany the Road Casualty Statistics Greater Manchester 2006 (GMTU Report 1288). As a trial, these two accompanying reports will only be produced in electronic format this year. All commentary is included in the main report. The layout of this report follows a similar format to that of Appendices 1 and 2 in the 2005 report (GMTU Report 1137).

This report presents tabulations and comparisons of road traffic accidents and casualties by district.

Section one provides data for each of the ten districts plus Greater Manchester as a whole, whilst Section two provides comparisons between districts.

No commentary is provided in this accompanying report, but it is worth noting that the data shows that the trends in Killed and Seriously Injured (KSI) vary considerably between the ten districts. In 2006 KSI casualties varied from 44% below the base years (the average of 1994 to 1998) in Rochdale MBC compared to only 2% below in Trafford MBC. In Greater Manchester as a whole, KSI casualties were 27% below the base.

The figures for changes in child KSIs were encouraging and range from a 28% fall in Bury MBC to 62% in Wigan MBC. In Greater Manchester as a whole, child KSI casualties were 45% below the base.
